

# **Ionic in 30**

## **with Vue**

Mike Hartington | @mhartington

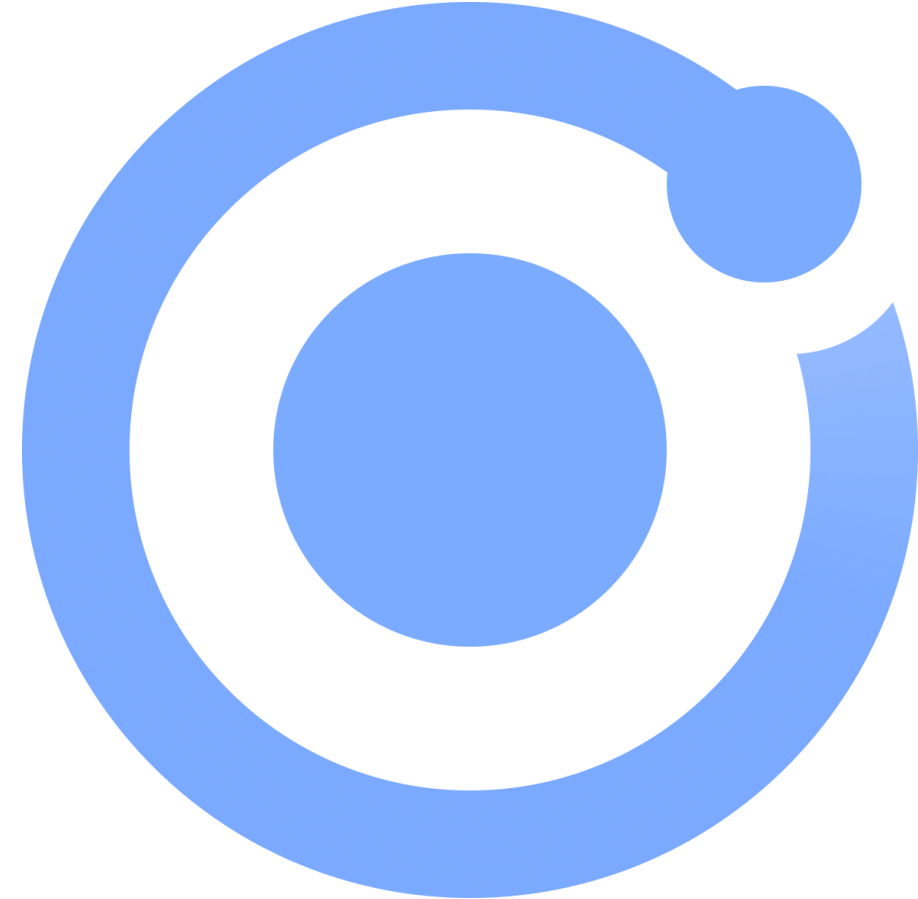

## House Keeping Items

This webinar will be recorded

Slides and recording will be emailed

Post your questions in the Q&A

# What is Ionic?

UI Components for native mobile apps and PWAs with the web

High-quality components, animations, gestures

Platform Continuity for iOS and Material Design

Extensible API for customization

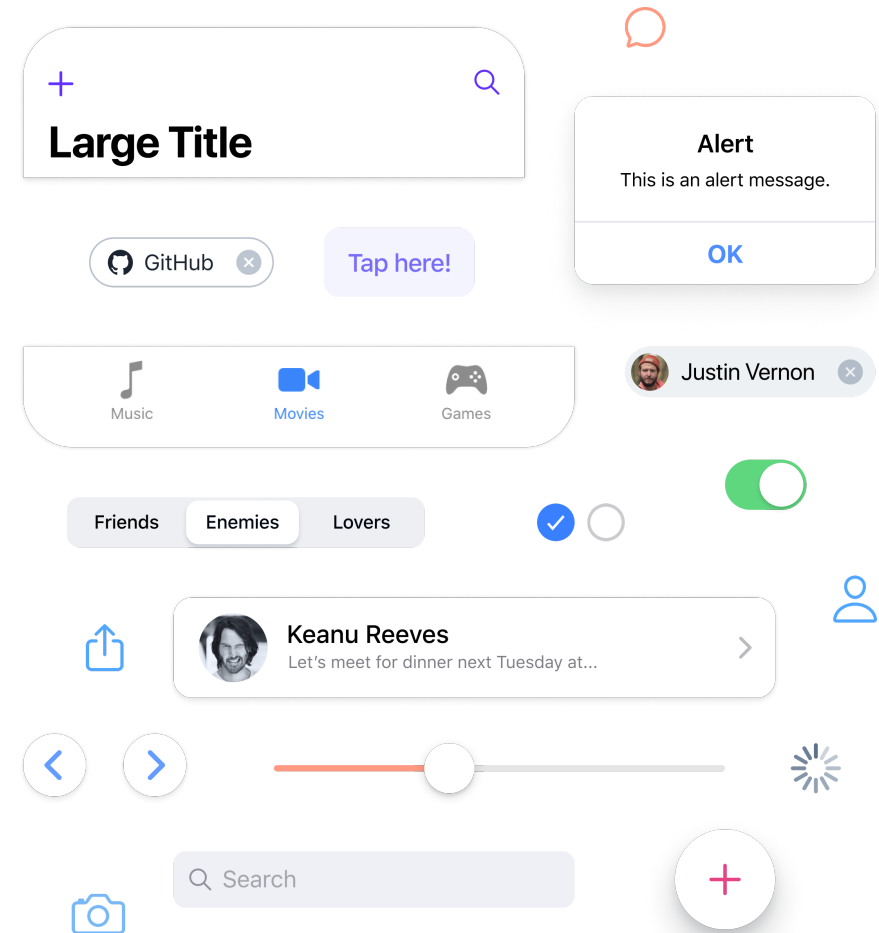

@mhartington

# Components and Interaction

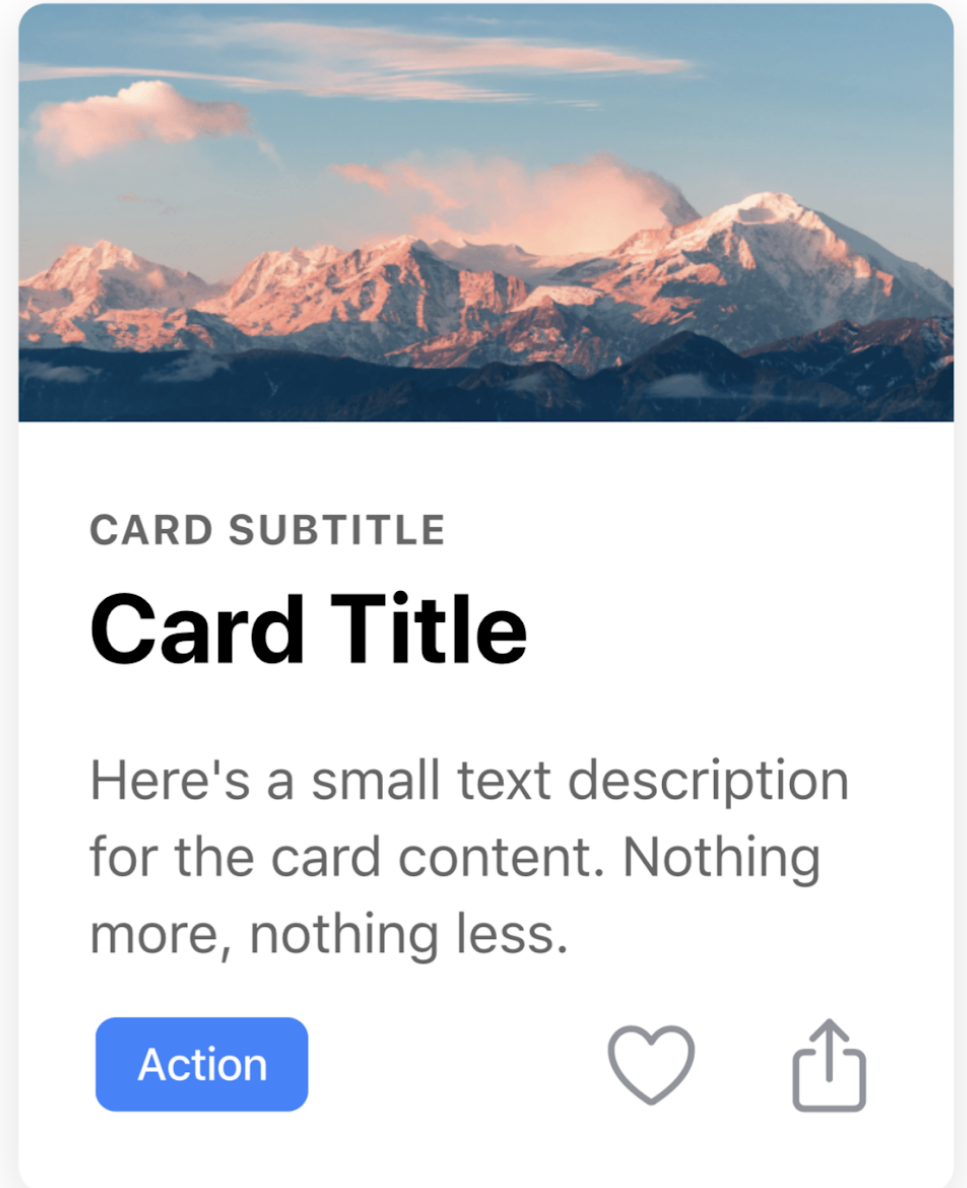

Tabs, buttons, cards, grids, oh my!

Gestures and Animations for interaction

CSS utilities and custom properties

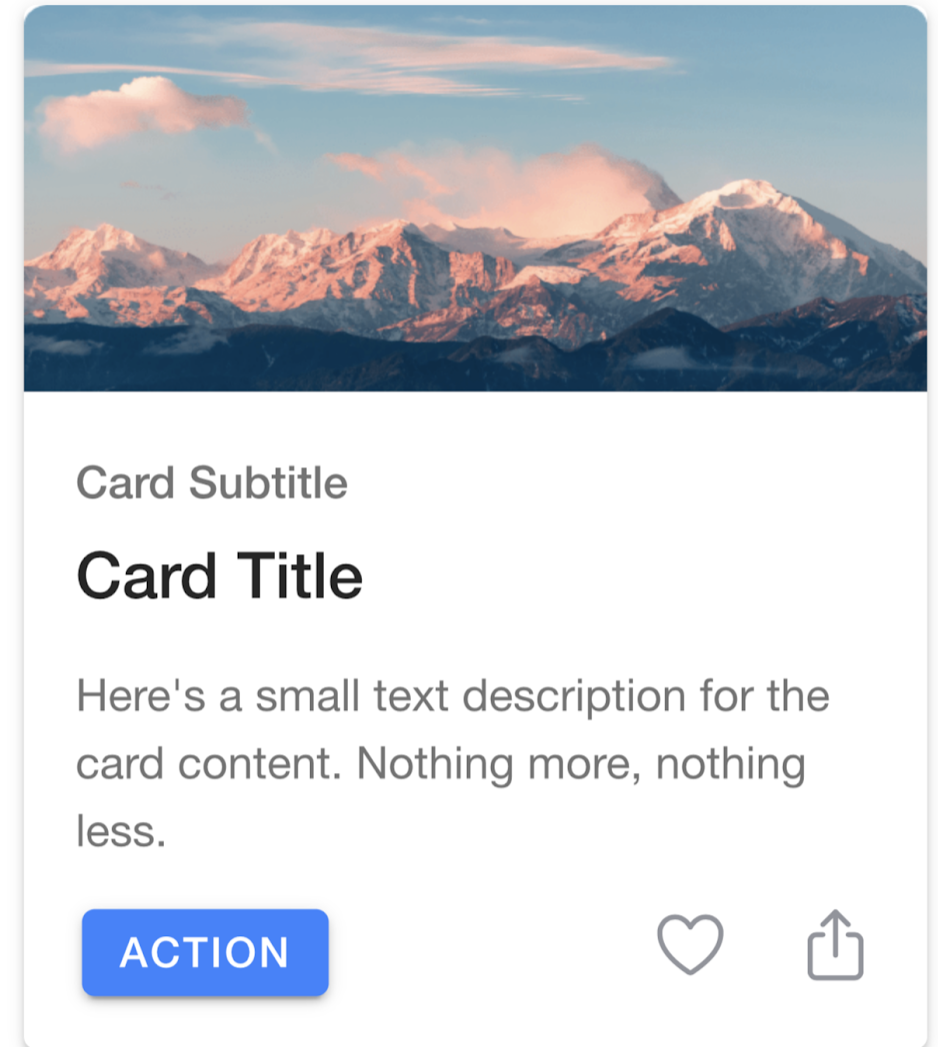

```
<ion-card>
  
  <ion-card-content>
    <p>
      Here's a small text
      description for the card
      component. Nothing more,
      nothing less.
    </p>
  </ion-card-content>
</ion-card>
```

## Material

```
<ion-card>
  
  <ion-card-content>
    <p>
      Here's a small text
      description for the card
      component. Nothing more,
      nothing less.
    </p>
  </ion-card-content>
</ion-card>
```

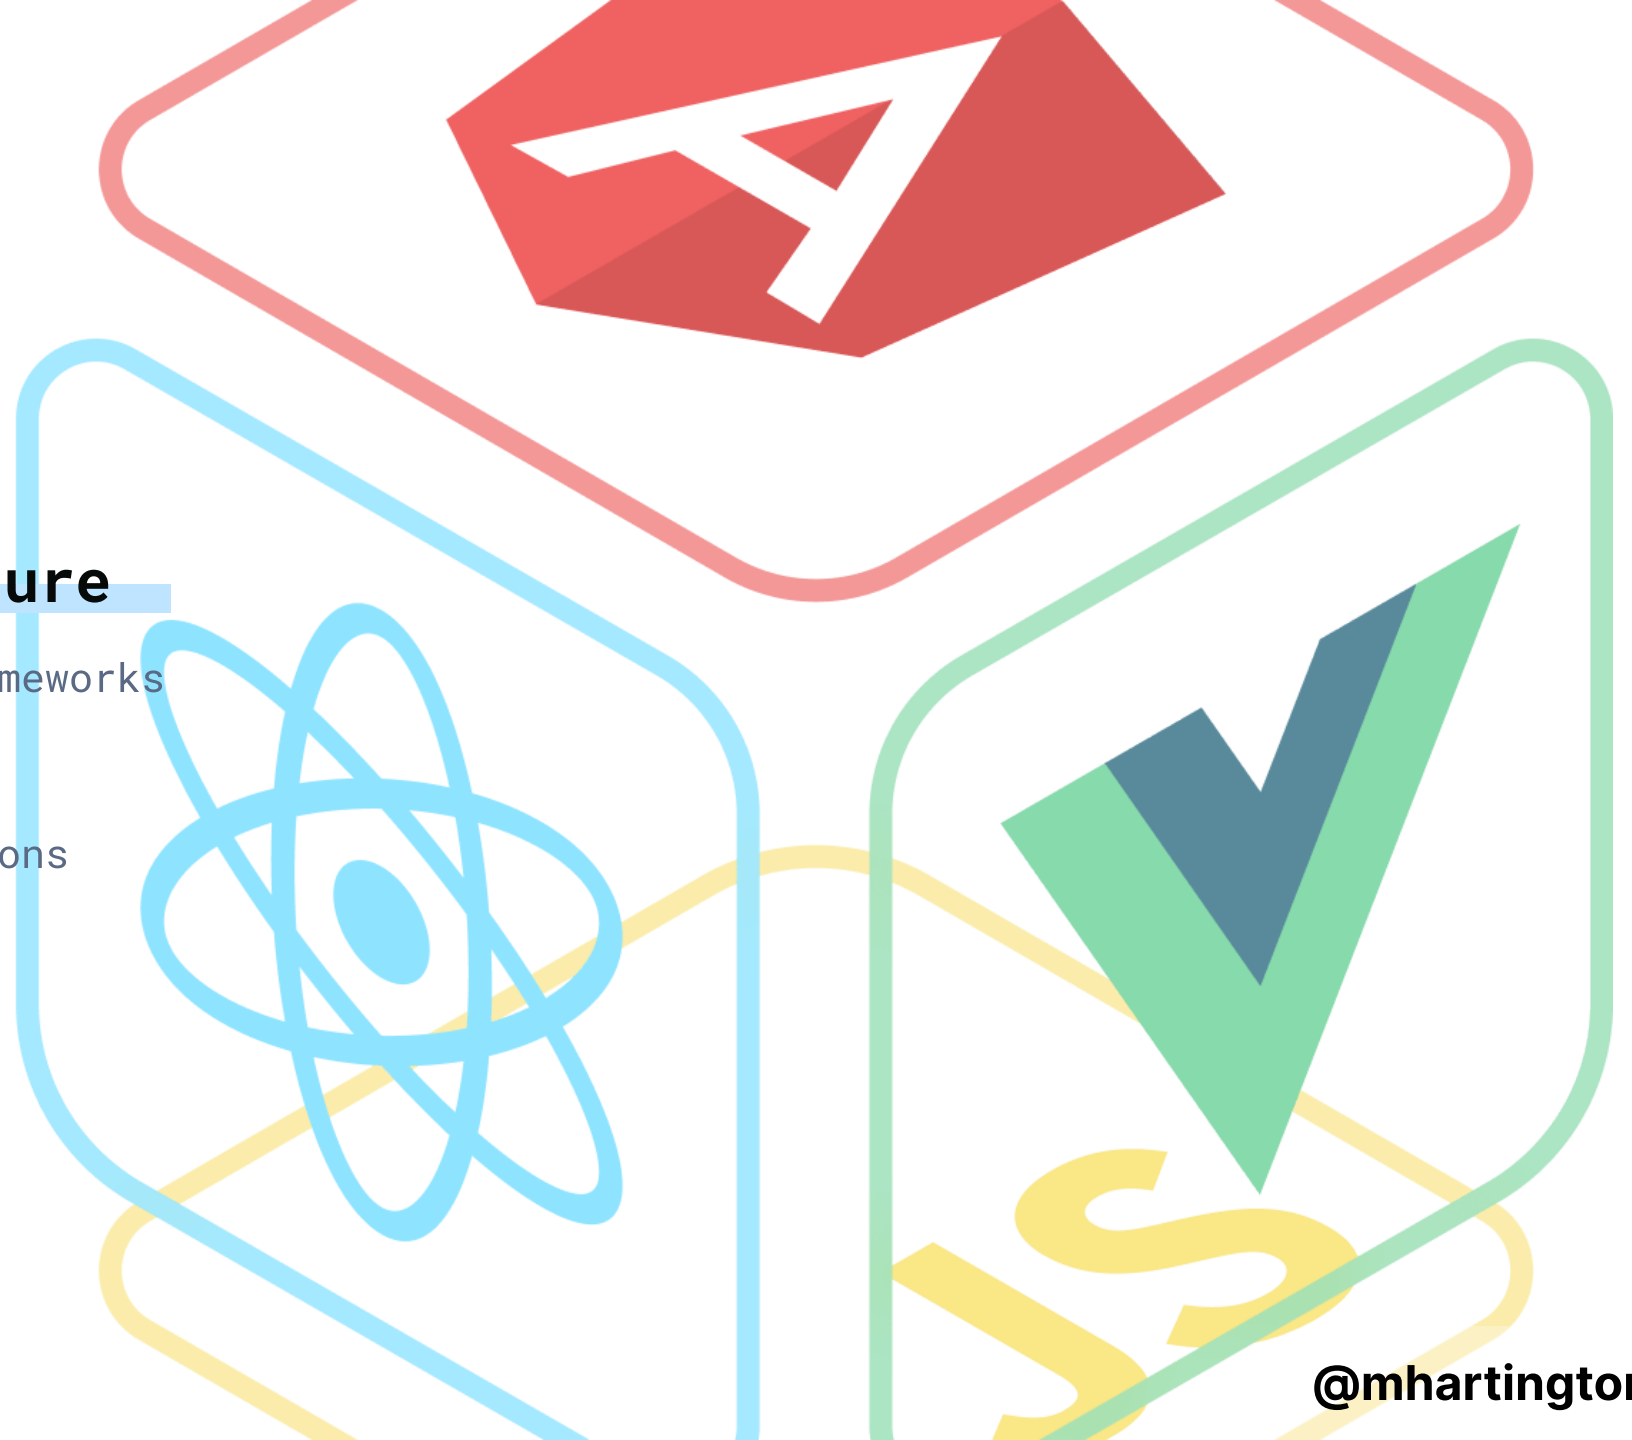

## Choose your own adventure

Integrates with most popular frameworks

Components in the "native" API

Router Integration with transitions

## In Good company

Community members all around the world  
Trusted by top companies for their apps  
Community contributions all on GitHub

EA

5M+  
developers

CAT

10M  
apps created

Panera

AIRBUS

100+  
Meetups

NASA

30K+

@mhartington

# The Progressive Framework

Familiar environment: HTML, CSS, JS

Simple: An API for beginners and senior devs

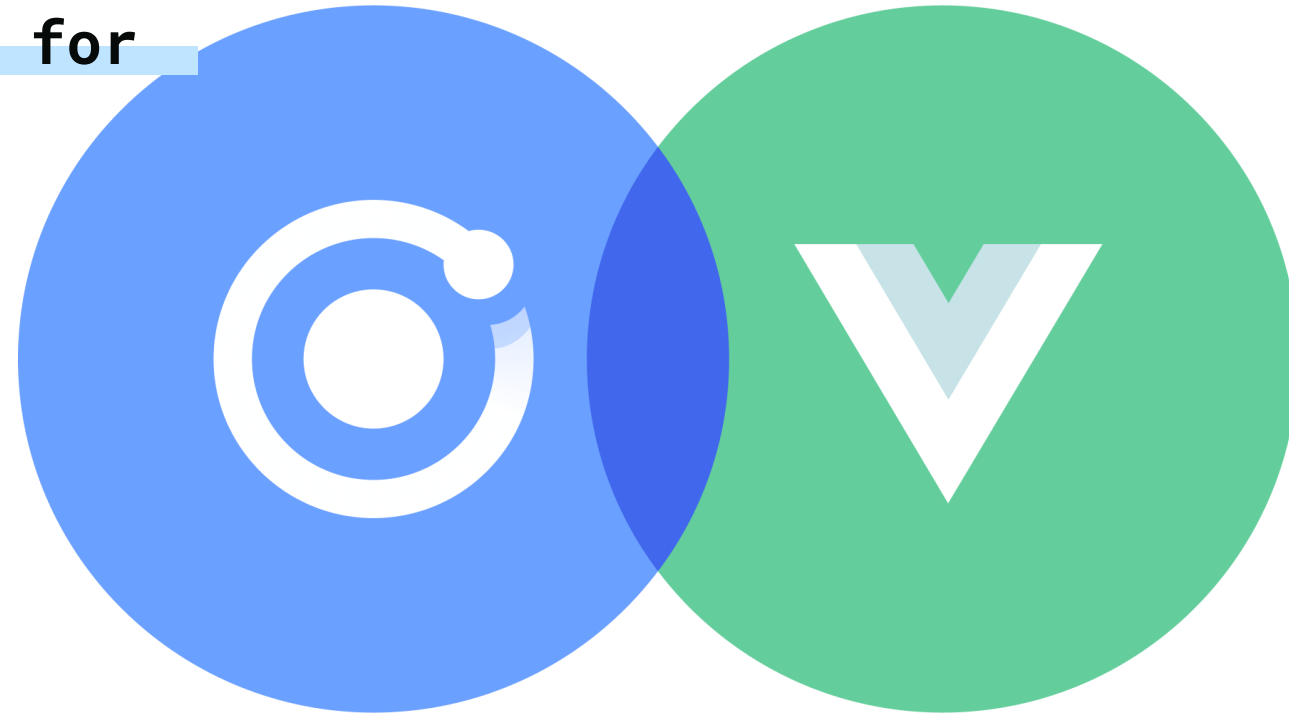

Performance: Fast from the start and stays fast

# @ionic/vue: Native Vue components for Ionic

Ionic Components as Vue Components

Vetur and DevTools Integration

“It’s just Vue”

## Demo

```
$ ionic start
```

## **Ionic and Vue are a perfect match.**

Vue is a great framework for great apps

Simple concepts, ease of development

Ionic provides great UI for great apps

Ionic + Vue = 🎉❤️
